Trawl_Rule_v0.1.2_EN

1) Components

Score Cards (12 cards total)

- `4` card: 1
- `3` card: 1
- `2` cards: 2
- `1` cards: 4
- `0` card: 1
- `⇆` (Tsunami) cards: 2
- `X` card: 1

> 총 12장

Ship Cards (4 cards total)

- Cards showing ships of different sizes.

---

2) Goal

- Play a number of rounds equal to the number of players.
- Add up the score from each round.
- The player with the highest total score wins.

---

3) Round Overview

Each round is played in the following order:

1. Round setup & ship distribution
2. Mancala phase (2 times per player)
3. Placement / Re-placement phase
4. Reveal & scoring

---

4) Round Setup & Ship Distribution

1. Shuffle all 12 score cards.
2. Place the cards face-down in a circle, forming 6 pockets with 2 cards each.
3. Each player receives one ship card.
    1. In a 4-player game, use all ship cards.
    2. In a 3-player game, use ships `1, 2, 3`.

First round

Randomly determine player order.
Starting from that player and going clockwise, give ship cards in descending order.

Later rounds

Each player takes the ship card one number higher than the one they had in the previous round.
The player who had the highest number takes ship `1`.

---

5) Mancala Phase (2 times per player)

5.1 Turn Order

- Turns are taken based on ship number, from highest to lowest.
    - 3 players: `3 → 2 → 1 → 3 → 2 → 1`
    - 4 players: `4 → 3 → 2 → 1 → 4 → 3 → 2 → 1`

Each time a player's turn comes, they perform one Mancala action.
After everyone has acted once, repeat in the same order.
Each player performs **2 Mancala actions per round**.

5.2 Mancala Rules

1. Choose one pocket.
2. Take all cards from that pocket and look at them.
3. Starting from the next pocket clockwise, place the cards one by one face-down.
4. When all cards are placed, the turn ends.

---

6) Placement / Re-placement Phase

- Players place their ships in order of **ascending ship number**.
- A ship may be placed in:

    - **an empty pocket**, or
    - a pocket containing **a ship with a lower number**.
- If a ship is placed in a pocket with a lower-number ship, that ship must immediately be re-placed.
    - Re-placement follows the same rules.
    - Re-placement may occur multiple times.

---

7) Reveal & Scoring

1. After all ships are placed, reveal all cards.
2. Resolve Tsunami cards.
3. Each player scores the pocket where their ship is located.

7.1 Tsunami ⇆

- If a pocket contains a Tsunami card, all ships in that pocket move to the pocket containing the other Tsunami card.
- If both Tsunami cards are in the same pocket, nothing happens.
- Scoring is calculated after the movement.

7.2 Pocket Score

- If the pocket contains an `X` card → score is **0**
- Otherwise → score is the sum of the numbers
- Tsunami cards have no value

---

8) End of Game

- After all rounds are completed, add up all scores.
- The player with the highest total wins.
- If tied:
    - The player who scored more points in the final round wins.

Variant Rule

- During ship distribution:
    - The player with the lowest total score chooses a ship first.
        - If tied, the player who had the lower ship number in the previous round chooses first.
    - Starting from that player and proceeding clockwise, the remaining players receive ship cards in numerical order, continuing from the chosen number and wrapping around to 1 after the highest number.

> Example: If the player chooses ship 4, the next players receive ships 1, 2, and 3 clockwise.
